INTRODUCING
The Revolutionary State-of-the-Art
THE YOU SELECT®

Model #LWV 9000 The Snack & Toy Machine
The 4-in-1 Space-Saver Vending Machine

Now you can offer your customers 4 choices in the space that is required by 1 vending machine. Known as the “you turn it” style vending machine, this revolving vending carousel will spin 360-degrees allowing your customers to view all 4 choices in each interchangeable canister.

This is the **Rolls Royce** of vending machines!
Lifetime Parts Warranty!

The specifications, configurations, and capacity of the vending machine is subject to change without notification.

Assembly required.

The You Select[®]

The 4-in-1 Space Saver Machine

**TRADE THIS
FOR THIS!**

You get **4 complete**
vending machines in **1**
using up only **half** the floor space!

The specifications, configurations, and capacity of the vending machine is subject to change without notification. Assembly required.

INTRODUCING THE

NEW 50¢ COIN MECH!

Made of *steel* and *chrome*-plated, *NOT* cheap plastic.

Now **YOU** Can Make

**DOUBLE
DOUBLE**

The **MONEY!**

Instead of selling the snacks for only 25¢, my machine can now sell the snacks for **50¢!** Now, with my

new **50¢ Coin Mech**, you can sell **Healthy** snacks in my machine

My new coin mechanism is the **only one** that is fully adjustable up to **\$1.50!**

I call it the **Smart Mech®!**

that cost more and could never be sold for just 25¢!

=== FOR EXAMPLE ===

1. Cashews
2. Pistachios (shelled)
3. Trail Mix
4. Granola Mixes
5. Yogurt-covered Raisins and other fruit mixes.
6. Dark chocolate-covered peanuts or almonds.
7. Acai berries covered in dark chocolate
8. Mixed nuts, peanuts or almonds
9. Sunflower, pumpkin and other seeds

The specifications, configurations, and capacity of the vending machine is subject to change without notification. Assembly required.

Fast And Easy Access to Your Money!

My machine has two (2) separate coin drawers, which can be accessed from the sides of the machine without requiring the removal of the four (4) interchangeable canisters on top or without pulling the machine out from the wall and lifting it around.

FAST & Easy
access!

Coin Capacity

Depending on how the coins stack up, the two (2) coin drawers combined will hold a grand total of up to \$150.00 in quarters.

This is **not** an earning claim. It's the coin capacity of the machine.

The specifications, configurations, and capacity of the vending machine is subject to change without notification. Assembly required.

THE YOU SELECT®

Model #LWV 9000 The Snack & Toy Machine State-of-the-Art Modular Design Revolutionary Interchangeable Canister System

*Simplest Machine To
Service In The Industry!*

Service Tote Holds up to
4 extra canisters

This snack vending machine is the easiest vending machine you will ever operate. With the new revolutionary interchangeable canister system. It is very quick and easy to refill or exchange candy by simply removing the candy canister and dropping in a new one. Cut your service time in half by purchasing extra canisters and refill them back at your home or office. Once you get to the location just swap out the canisters, empty the money, and away you go. Makes servicing a snap!

New vendors love our Interchangeable Canister System because it saves them a ton of time in servicing their route. They also love the fact that it's a lot more professional to swap out canisters rather than handling numerous bags of candy in front of customers or employees in each location.

NOT ALL VENDING MACHINES ARE CREATED EQUAL!
Saving a few dollars at the time of purchase could haunt you every time you service (and have to repair) your machines!

To service your machines...

You will use the service tote to transfer your filled interchangeable canisters from your home to your car and from your car to your locations. This system will cut down your service time to half of the normal time it takes to service a machine.

Service Tote holds up to 4 extra canisters

The specifications and configuration and capacity of the Service Tote are subject to change without notification.

Help the *Needy* While Helping *Yourself!*

By placing these special charity donation decals on each one of your units, you will save up to thousands of dollars per year in commissions not being paid to the stores and businesses had you *not* participated in the program! Plus you get to help needy children.

NOTE: You will purchase the optional charity decals from the charity that you signed up with. They are NOT included with the machines and may vary from the picture.

Model #LWV 9000 You Select[®] Snack and Toy Machine

The Space-Saver

The 9000 **You Select[®]**

The First Vending Machine Ever To Be Designed Vertically instead of Horizontally!

Fits Into Any Corner!

Easiest Machine to Locate/Place!

Height approx. 45 inches tall

Only 11 inches wide

Weight approx. 50 lbs.

will vend/sell **Super Balls[®]**, a huge seller with both boys and girls!

This gives YOU, the machine owner, a huge, up to 5 times, mark-up per vend/sale!

NOTE: To sell toys, Super Balls or Gumballs, you will need to purchase round dispensing wheels. These wheels are **NOT** included with the machines unless you purchase them.

What makes the 9000 YOU SELECT® The Rolls Royce of Vending Machines?

1 The Space-Saver

The #1 reason stores and businesses will not let us place a vending machine in their building is they have no floor space for the machine! That's why I designed my elegant machine to be as **compact** as possible – a **"SPACE-SAVER"**! How did I achieve this while other vending machine manufacturers continue to design their machines horizontally? I broke the mold. I went ahead and designed my machine **vertically** instead of horizontally. My machine is only **11 inches wide!** Yet it still offers four (4) different products and it can be placed easily into any corner of a room. This makes it the easiest machine to locate/place!

2 Interchangeable Canisters

Four (4) rectangular, shatterproof display, polycarbonate, interchangeable canisters hold approximately **9 pounds** of candy each. You can purchase extra canisters, and **refill** them back at your **home**, and then swap out the empty canisters for the filled canisters at the stores and businesses. By doing this, you will cut your service time in half! The 4-in-1 offers four (4) choices of candy in a vertical space required by only one machine.

3 Durable Paint on Zinc, Steel Case

Top quality, 2-coat, powder finish/paint, long lasting, scratch and rust resistant. Strong, commercial grade, anti-tamper, steel case **helps prevent break-in!** The case is constructed of expensive **"zinc"** steel and then baked at over 1000 degrees to produce what is termed **"treated, fired steel"**! By using this combination of **zinc** and treated, fired steel, the **case will last you a lifetime!**

4 The Smart Mech® - 4 Zinc, Steel Coin Mechanisms

Strong commercial grade, **anti-slug** and **jam resistant, chrome-plated** coin mechanisms! Constructed of expensive **"zinc"** steel and then baked at over 1000 degrees to produce what is termed **"treated, fired steel"**! By using this combination of **zinc** and treated, fired steel, the coin mechanism will **last you a lifetime!** **Adjustable** up to **\$1.50** by purchasing a new parts kit!

5 Fast and easy access to your money!

My machine has two (2) separate coin drawers, which can be accessed from the **sides** of the machine **without** requiring the removal of the four (4) interchangeable canisters on top or without **pulling** the machine out from the **wall** and **lifting** it around.

6 Revolving vending carousel

Rotates **360 degrees** in either direction on a steel ball bearing, turntable to allow your customers **easy access** to all four (4) products.

7 Zinc, Steel Barrel Locks

State-of-the-art commercial grade barrel/tubular locks constructed with **"zinc"** steel! **Anti-tamper, anti-pickable** locks help **prevent break-in** to protect your candy and money!

8 Spill Trays

A must have feature to keep snacks from spilling onto the floor!

Do You Know What Is Wrong With This Style Vending Machine Called The Globe Machine?

1 Machine too large to place easily
This style machine is designed **horizontally!** It requires too much floor space and won't fit into a corner of a room making it difficult to place.

2 Cheap Locks
The locks are a cheap, **flat-key** style, which are very easy to **pick** or **break** open!

3 Servicing Nightmare!
You must remove four (4) locks and four (4) lids to fill with candy or remove the money.

4 Servicing Nightmare!
This style design machine has **globe** canisters, which do **not** fit into any size service totes. Therefore, you will not be able to purchase extra canisters to **refill** them back at your **home** and then swap out the empty canisters for the filled canisters at the stores. Your service time will then be **double** what it would be with our 4-in-1 vending machines.

5 Cheap Coin Mechanism
Accepts Slugs and Jams
Coin mechanisms are constructed of **cheap**, scrap metal, like aluminum, only made to work for about one (1) year and then need **replacing!** Most of these 25¢ coin mechanisms cannot be swapped out for 50¢ coin mechanisms.

6 Cheaply Constructed Case
The **case** that holds the money is either constructed of **cheap** plastic or **cheap** scrap metal, like aluminum. They are both very easy to **crack**, **dent**, or **break** into the case and **steal** your money!

7 Money is Difficult to Remove
The money is very difficult to **remove!** You must **remove** the entire globe canister. There is no side access.

8 No Spill Trays
A **must have** feature to keep snacks from spilling onto the floor.

WARNING: Most of these globe machines are manufactured in **China** and only have a life expectancy of about one (1) year.

What is **wrong** with this vending machine called **the 3-Select**?

1

Machine too large. Difficult to place in a corner.

This style machine is designed **horizontally**. It requires too much floor space making it difficult to place in a corner of a room.

2

Cheap Locks

The locks are a cheap, **flat-key** style, which are very easy to **pick** or **break** open.

3

Servicing Nightmare!

This 3-Select machine does **not** have interchangeable canisters. Therefore, you will not be able to purchase extra canisters to **refill** them back at your **home** and then swap out the empty canisters for the filled canisters at the stores. Your service time will then be **double** what it would be with our 4-in-1 vending machines.

4

Lead Paint on Cheaply Constructed Case

The candy and nuts touches the **lead** paint on the case of the machine making it very **dangerous** to eat!

The **case** that holds the money and candy is either constructed of **cheap** plastic or **cheap** scrap metal, like aluminum. These are both very easy to **crack**, **dent**, or **break into** the case and **steal** your money!

5

Cheap Coin Mechanism Accepts Slugs and Jams

Coin mechanisms are constructed of **cheap**, scrap metal, like aluminum, only made to work for about one (1) year and then need **replacing!** Most of these 25¢ coin mechanisms **cannot** be swapped out for **50¢** coin mechanisms.

6

Difficult to Remove Money

Removing the money is very difficult on all 3-Select machines. You must **pull** the machine out from the **wall**, and **lift** it around in order to remove the **money**. Why? Because the access door is **behind** the machine, not on the **front** of the machine where it should be!

WARNING: Manufactured in China.

Most of these 3-Select machines are manufactured in China and only have a life **expectancy** of about one (1) year.

Less Profits

The 3-Select will **never** make as **much money** as our 4-in-1 machine, in part, because there is one less selection.

Sweet Success

Wait until you hear what **m&m's®** (the world's most famous chocolate) does for you: they spend over \$60 million dollars a year on advertising at no cost to you, which creates an enormous demand for vending machine owners such as yourself. Advertising!!! The number one reason for business failures... and the same reason why vending succeeds.

Now listen to this: over 20 million servings of **m&m's®** are bought and enjoyed daily! And now, for the very first time, you can share in the profits! **m&m's®** sell themselves and have been doing so for the last 60 years. Do you remember when you had your very first serving of **m&m's®** chocolate candies?

m&m's® chocolate candies - an American tradition since June 23, 1941 when they were first introduced as a non-messy candy to the soldiers. You know the slogan, "Melts in your mouth, not in your hands!"

The **m&m's®** brand name is one of the top ten household brand names in America today!

Having a Business With No Advertising Costs

You merchandise products that have had billions of advertising dollars spent on them. **m&m's®** are, for example, the number one selling candy in the world. During the **Super Bowl** they spend over **\$1.5 million** on one single ad.

Make The Bowl Better With **m&m's**
CHOCOLATE CANDIES

Hey, who ate all the "M&M's"® Candies?

NET WT 14.0 OZ 396.9g

NET WT 14.0 OZ 396.9g

NET WT 14.0 OZ 396.9g

The advertisement features the Yellow and Red M&M's characters sitting on a brown couch. The Yellow character is on the left, wearing a white wristband and white gloves, with a football helmet on the couch between them. The Red character is on the right, holding a large, empty glass bowl. In the foreground, there are three bags of M&M's Chocolate Candies: a black bag, a blue bag, and a yellow bag. The text 'Make The Bowl Better With m&m's CHOCOLATE CANDIES' is at the top, and 'Hey, who ate all the "M&M's"® Candies?' is in the middle. Three bags of candy are at the bottom, each with 'NET WT 14.0 OZ 396.9g' printed on it.

Here are just a few of the many great snacks you can sell!

Nuts are a **huge** seller!

How Much do Americans Spend on Candy?

The power of the sweet tooth

Each day, Americans spend over \$15,000 a minute, almost \$1,000,000 an hour and over \$22,000,000 on candy alone. The manufacturers spend millions monthly keeping the product in front of the public. You couldn't have a product that is **more in demand!** You pay **absolutely nothing** to advertise. Unlike most businesses, it's done for you.

Sure, Americans are spending billions on diets and low-cal and fat-free foods. But if everyone is so hell-bent on eating right, why did the average American gobble up more than **24 pounds** of candy in 2015 compared to only **16 pounds** in 2010? (Source: U.S. Department of Commerce)

Based on figures from the U.S. Commerce Department, the trade association reported that Americans spent approximately **\$25 billion** on **7.1 billion pounds** of sweets last year, at least **HALF** of that sold from vending machines. The record-breaking numbers for 2015 indicate that the typical American consumed a minimum of 2 pounds of candy a month, continuing a trend that has been growing for the past five years.

Who Eats the Most Candy?

While most children are Voracious candy eaters, **ADULTS** actually consume more candy than both children and teenagers combined. Adults consume **55%** of all candy.

Vending is NOT Small Change. It's Big Business!

Last week alone, Americans plunked a staggering 600 million dollars into vending machines. That's over 3 million dollars an hour... and more than enough quarters to circle the earth!

**Now you can have the
TIME, FREEDOM, and MONEY
to enjoy life to the fullest.**

Wouldn't it be exciting to own a vending route where the most difficult part of your job is **collecting the cash?**

Every 15 minutes, over **3.5 million** coins are dropped into vending machines. That translates into **12.5 million** coins every hour. Do Americans like vending machines, or what??
