INTRODUCING

Model #LWV 1400 The Snack Vendor®

People can't resist
dropping in their dollars.
WOW! What a money maker!

Assembly required.

**The easiest and least expensive way
to get into the vending business!**

The Model #1400 Snack Vendor[®] Holds Up To **\$100.00** in Dollar Bills!*

WANT TO COLLECT DOLLAR BILLS?

* NOTE: This is not an earnings claim.
It is the dollar bill capacity of the Snack Vendor[®].

IMPORTANT **MUST READ**

PLEASE NOTE: The Model #1400 Snack Vendor® is **NOT** a vending machine!

It is a **self-serve vending unit** where you **trust** that the customer **will pay** for their snack!

It is **much better** than a vending machine because vending machines **break down** and **stop** working. The Model #1400 Snack Vendor® will **not break down and stop working!** **Why?** Because it has **no** mechanical parts, uses **no** electricity, has **no** electronics and **no** refrigeration! It only has a **hinged lid** making it self-serve. It's **always** making you **money!**

With the Model #1400 Snack Vendor®, the **self-serve vending unit** where the customers **help themselves**, the customer lifts the cover lid and removes their snacks, and then **pays** for their snacks!

The **money** is **always** under **lock** and **key!**

Please **ask** me why I am **not** worried about customers removing some snacks and then **not** paying for their snacks.

Is there a **secret** way to deal with the possible **theft** of the snacks???? **YES!** Call me and learn about my **secret!**

Cover Lid**
so you can
stock vendors
at **home** and
place in car
without snacks
spilling out!

**#2 Optional
Big Billboard
Charity Sign!**

To feature pictures
of missing children and
800 number. Dramatically
helps **increase sales
and donations!**

**COLLECTS
DOLLAR BILLS!**
Holds up to **\$100**
in \$1 dollar bills!

Charity Brochure Holder!

So your customer can take home a brochure and read about your favorite charity. We have learned that this will dramatically **increase** your sales and donations.

Minimize Melting Chocolate!

The white-colored back and sides of the vendor are made of 6mm expanded PVC. This material is extruded, a process that creates a thick plastic piece filled with tiny air bubbles and acts as a great heat insulator. This will help **protect** your **chocolate** snacks from **melting** by **blocking** out the **sunlight** and **heat** for the back and two (2) white sides of your vendor.

PLEASE HELP!
National Missing Children's Society

DONATE HERE!

See-through Window!

Is made of high-impact, space age acrylic.

Four (4) Suction Cups for Added Security!

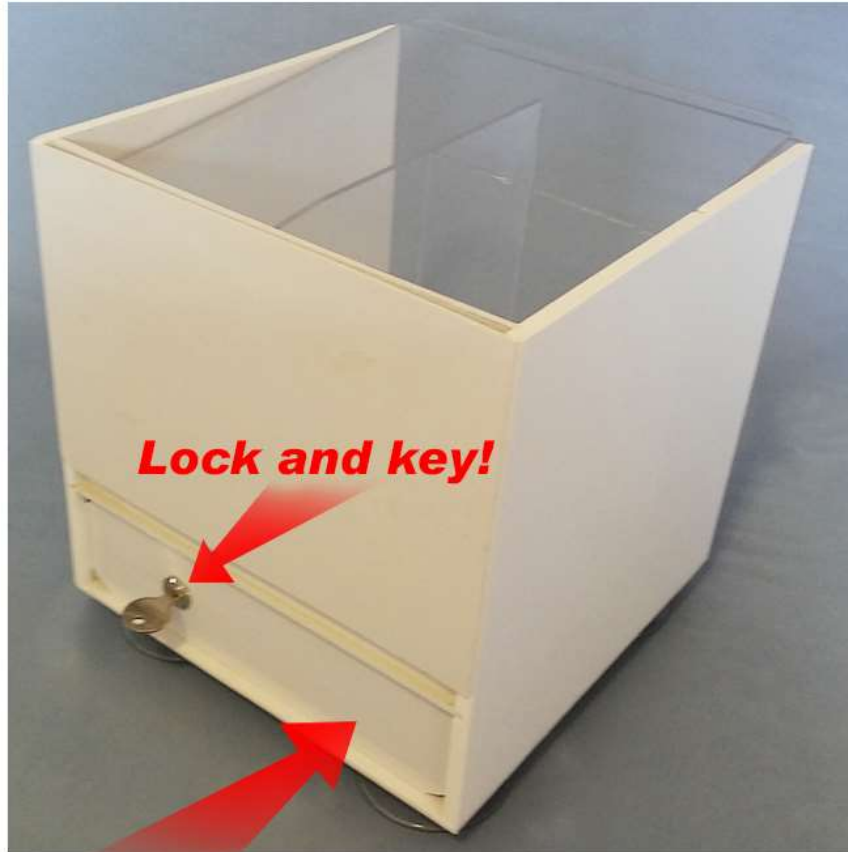

Each Snack Vendor® has four (4) suction cups attached to the bottom of the vendor to help protect your investment (the vendor) from someone walking off with it. Anything can be stolen, but I don't make it easy for them.

Locking Cash Box To Help Protect Your Money!

Built-in Lock on Back of Vendor!

No Padlocks or security ties needed. You get a **built-in lock** with every vendor plus all locks work with the **same key** ("keyed alike").

NOTE: Store owners hate the look of padlocks on their counters!

How the Cash Box is Built

The cash box is made of space age, high-impact plastic, the **strongest** plastic money can buy followed by a lock and key. Anything can be broken into, but I try not to make it easy for them.

NEW! All Snack Vendors®
Now Include A
Lock and Key to Help
Protect YOUR Money!

NOTE: All your locks will work with the **same key!**

The specifications, configuration, and capacity of the vendor are subject to change without notification.

NOTE: **NO** lock and/or door will prevent vandalism.
NOT responsible for vandalism!

It's All About The **CASH!** Why collect quarters when you can collect **dollar bills?**

Large Cash Box Capacity accepts up to 100 dollar bills without the need to fold them due to my large, horizontal money slot.

Most of the Money Hidden from the Public! I designed the cash box and vendor to **not tempt** the public from stealing the **money** or the vendor by showing as little of the money as possible. (Most of the **money** is hidden.) I only show a **small portion** of the **money** - just **enough** so that the customer understands where to insert the **money**.

What makes this decal a very special, state-of-the-art, pricing decal?

There are many reasons!

On the top of the list is this decal is designed to help the vendor collect dollar bills. not just quarters!

What is your Favorite Snack?

Fun-sized

Miniatures

Here are just a few of the **many** great snacks **you** can sell!

As Seen In Places Like:

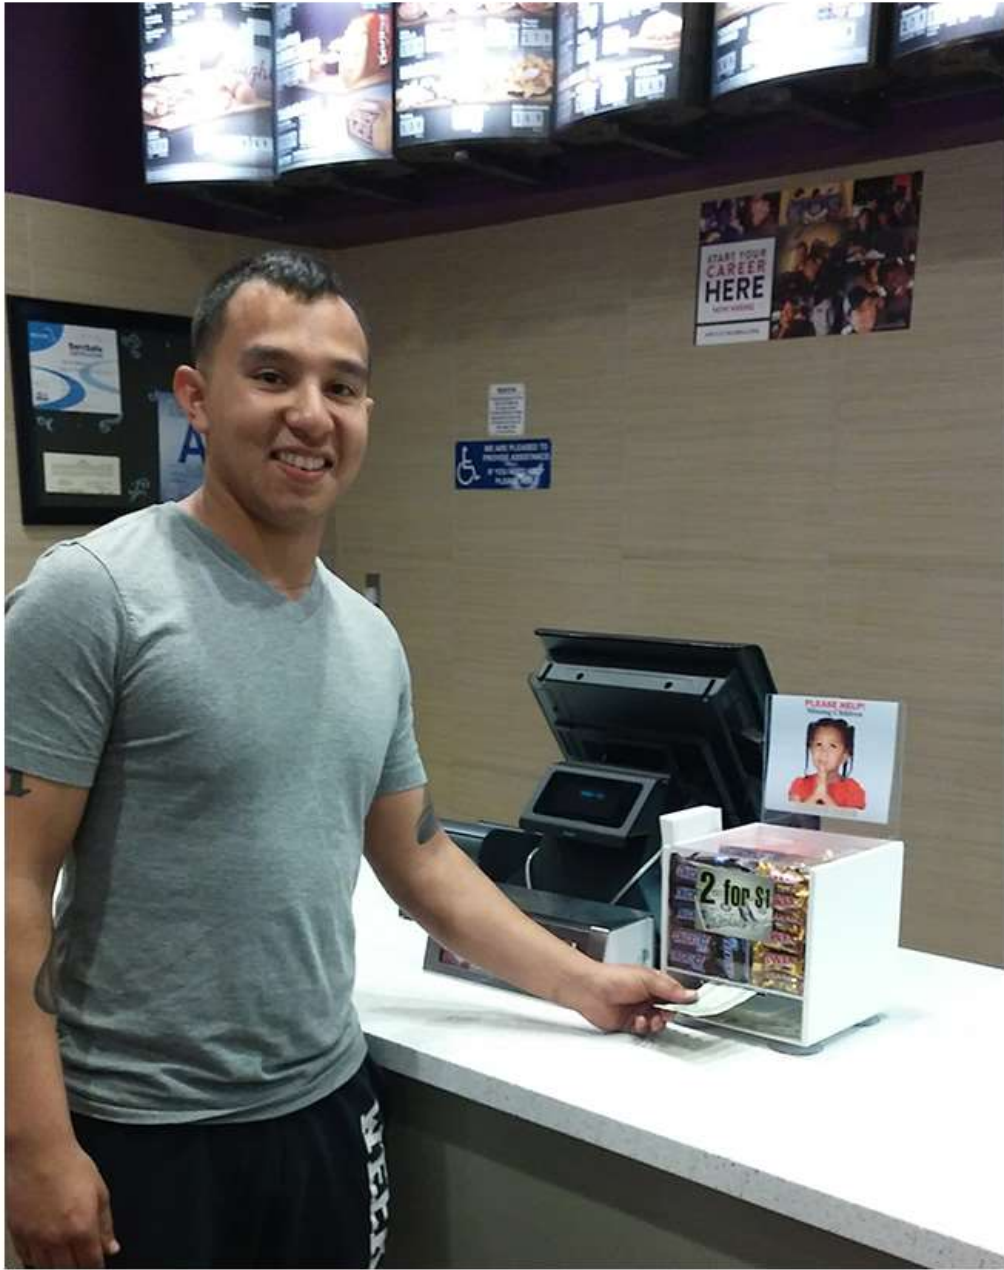

As seen in business since 1985.

The “Snack Vendor[®]” ...

are placed on **cash register counters** in local, high traffic businesses like convenience stores, fast food restaurants, pizza shops, bowling alleys, gas marts, bars and taverns, hair salons and barber shops, pawn shops and tanning salons, banks and tattoo parlors, offices and auto repair shops. etc.

The 3 keys to your success...

#1: LOCATIONS!!!

#2: LOCATIONS!!!

#3: LOCATIONS!!!

How many of each type of location listed below do you think you have in your area? Right now, fill in the blanks with your estimated numbers and you'll begin to understand why you will never run out of locations for the vending machines. Your machines could very well be placed into any combination of these fine establishments, near the cash register, at the entry/exit, etc.

Fill in the boxes below to see that the location possibilities are endless!

Help The *Needy* While Helping *Yourself!*

By placing these special charity donation decals on each one of your vendors, you will save up to thousands of dollars per year in commissions not being paid to the stores and businesses had you **not** participated in the program! Plus you get to help needy children.

NOTE: You will purchase these optional charity donation decals from the NCCS. They are not included with the vendors and will vary from the picture.

Help The *Needy* While Helping *Yourself!*

By placing these special charity donation decals on each one of your vendors, you will save up to thousands of dollars per year in commissions not being paid to the stores and businesses had you **not** participated in the program! Plus you get to help missing children.

NOTE: You will purchase the optional charity decals from the charity that you signed up with. They are not included with the vendors and will vary from the picture.

Help The **Needy** While Helping **Yourself!**

By placing these special charity donation decals on each one of your vendors, you will save up to thousands of dollars per year in commissions not being paid to the stores and businesses had you **not** participated in the program! Plus you get to help needy animals.

Help The **Needy** While Helping **Yourself!**

NOTE: At this time we are **not** printing and selling this cat decal due to the fact that everyone is only ordering the dog decal.

**The #LWV 1400 Snack Vendor®
Is Manufactured like a Rolls Royce®!
It Will Outlast *You!* Lifetime Parts Warranty!**

FEATURES AND SPECIFICATIONS

- 1. Charity Brochure Holder!**
So your customer can take home a brochure and read about your favorite charity. We have learned that this will *increase* your *sales!*
- 2. Brochure or Sign Holder!**
Can also be used as a sign holder to showcase your charity decal sign. We have learned that this will *increase* your *sales!*
- 3. See-through Window!**
Is made of high-impact space age acrylic. Costs a lot more than standard acrylic, but should last you a lifetime!
- 4. Minimize Melting Chocolate!**
The white-colored back and sides of the vendor are made of 6mm expanded PVC. This material is extruded, a process that creates a thick plastic piece filled with tiny air bubbles and acts as a great **heat insulator**. This will help **protect** your **chocolate** snacks from **melting** by **blocking** out the **sunlight** and **heat** for the back and two (2) white sides of your vendor.
- 5. Built like a tank – super strength plastic!**
Rugged enough to withstand a **3-foot fall!** I use three (2) different kinds of space age plastics:
 - a. **High-impact** acrylic for the window,
 - b. **High-impact** PVC for the white back, sides, and bottom of the vendor, and
 - c. **High-impact** plastic to help **protect** the **cash** box.
- 6. Cover Lid!**
So you can **stock** vendors at **home** and then load in the car without snacks **spilling out**. Made of space age **high-impact** acrylic!
- 7. Compact Vendor Gets Better Placement in Stores!**
The vendor is designed for placement near the **cash register** on retail counters. The **closer** to the **cash register**, the **better!** Anything **over 7.8 inches** is **too big to be allowed** close to the **cash register** so I designed the vendor as a **7.8-inch cube**, same measurements for all sides!
- 8. Three (3) Different Selections of Snacks!**
Three different sized snack compartments to **adjust** preferences or manage margins. No need to **dig around** for your favorite snack because each snack selection is separate!

9. Vends/Sells both Miniatures and Fun-Sized Snacks!
Sells virtually any snack that will **fit** into the three (3) **different** size snack compartments – like candy bars, gum, breath mints, nuts, and lollipops. **Over 100** different snacks to sell!

10. My White Color Choice Works with Any Décor!
I chose the color **white** for two (2) reasons...
First, it **blends** well with **any décor**, giving it a **clean, sanitary** appearance, which makes it much more **acceptable** to up-scale locations. For example: Up-scale restaurants with **white tablecloths** love the appearance of the **Snack Vendor®**! I **discontinued** the use of flashy colors like **red** or **neon pink** and **green** because the more **up-scale** locations said “**no**” to placement because these colors didn't match their décor! The up-scale restaurants wanted a color that was subtle and not obtrusive.
The second reason I chose the color **white** over **all** the other colors available to me was it helps with the vendor staying **cooler** and not heating up as much, thereby helping to **protect your chocolate** from **melting**!

11. Never Out Of Order! Unlike regular vending machines, my **Snack Vendor®** is never out of order, never gets **sick** or **breaks** down. It has only two (2) moving parts, the cover lid and the lock. No **toolbox** needed!

12. Designed to Collect Dollar Bills, not just Quarters!
My state-of-the-art **pricing** decals are designed to encourage people to drop in **dollar bills, not just quarters**! Plus the decals allow you to **change** your retail selling price of the snacks. You can have a **price increase** or a **price decrease**. You are **never** locked in with any single selling price. That's why I **never stencil** or **permanently print** the **prices** or anything else on the **Snack Vendor®**! If you do, you are locked in **forever**!

13. Because of the Cube Size, You Have Unlimited Locations!
You should never run out of stores to place this **Snack Vendor®** due to its 7.8-inch **cube** size.

14. Fast/Easy Serving!
Just filling with snacks and removing the money takes under three (3) minutes **in and out**!

15. Weighs Only Two (2) Pounds!
The **Snack Vendor®** is **easy to manage**, even for vendor owners who are **disabled** or have **limited upper-body strength**.

16. Locking Cash Box to Protect Your Money!
a. Large cash box capacity accepts up to **100 dollar bills** without the need to **fold** them due to my large, horizontal money slot.
b. **Built-in Lock on Back of Vendor!** – No Padlocks or security ties needed. You get a **built-in lock** with every vendor plus **all locks** work with the **same key** (“keyed alike”). NOTE: Store owners hate the look of padlocks on their counters!
c. **Most of the Money Hidden from the Public!** – I designed the **cash box** and vendor to **not tempt** the public from stealing the **money** or the vendor by showing as little of the **money** as possible. (Most of the money is hidden.) I only show a **small portion** of the **money** - just **enough** so that the customer understands where to insert the **money**.

- d. **How the Cash Box is Built** – The cash box is made of space age, high-impact **plastic**, the **strongest** plastic money can buy followed by a lock and key. Anything can be broken into, but I try not to make it easy for them.

No Gravity Feed – Snacks never jam up or get stuck!

Unlike my **first** models from years ago that were designed **vertically**, I now make my vendors **horizontal** so the snacks no longer **dispense** from the **bottom** of the vendor. This is known as a “gravity fed” vendor.

- 17.** Gravity fed vendors will **jam up** by allowing the snack to get **stuck** or **jam up** inside the vendor causing the vendor to **stop** earning you money.

My units now only **dispense** snacks from the **top**, **not the bottom**, of the vendor keeping your vendor working for you full-time!

The Results? The **Snack Vendor®** is **100% Jam Free!**

- 18.** **Four (4) Suction Cups for Added Security!**
Each Snack Vendor® has four (4) suction cups attached to the bottom of the vendor to help protect your investment (the vendor) from someone walking off with it. Anything can be stolen, but I don't make it easy for them.

- 19. Proudly Made!**
Best engineering and quality control money can buy. Each **Snack Vendor®** is handcrafted.

- 20.** Lifetime Parts Warranty!
The **Snack Vendor®** **will outlive you!**

- 21.** The specifications, configuration, and capacity of the vendor are subject to change without notification.

- 22.** Assembly required.

Do You Know Why You Will Go Out of Business Buying This Type of Unit?

- 1** **The Money Can Be Easily Stolen!** - The Locked Lid can be broken open with a nail file, or screwdriver in 30 seconds!
- 2** **Fewer dollar bills!** - Each Dollar Bill must be folded twice before inserting into the slot. Most people will not take the time to fold them and you lose the sale!
- 3** **People can count your money** because the cash box is too exposed! People will see too much of your money tempting them to steal it or take the whole unit!
- 4** **Fewer donations!** - Charity sign/decals too small to read causing the unit to make a lot less money from lost charity donations!
- 5** **No cover lids!** -
A. This means you can't fill up your vendors at home and load them in your car without snacks spilling out of the unit!
B. You will have to wash out the inside of the vendor weekly due to the dust and dirt that will get inside of the unit because of not having a cover lid!
- 6** **No variety!** - You can only sell one selection of snacks! Selling more than one selection of snacks at a time requires the customer to dig around for their favorite snack, which customers hate and will not do! Selling only one snack selection means selling a lot less snacks!
- 7** **They are made of very cheap acrylic!** - If you dropped the vendor in a parking lot or if it was knocked off the store's counter top you are out of business! Most of these vendors will never even make it in one piece to your home as they will be damaged during shipping. They are not made of space-age, high-impact acrylic as they should be. Cheap is not good and good is not cheap!

Do You Know Why You **Will Go Out of Business** Buying This Type of Unit? (Continued)

8

Chocolate will melt!

These types of vendors are **not** made with PVC material that **insulates** the sides of the vendor from the **sun** and other **heat** sources like sitting too close to a pot of hot coffee. Your **chocolate** will **melt** in these types of vendors!

9

No brochure holders!

No **brochure** holders are attached for the **charity** you are representing. This dramatically **decreases the money** your vendor can make for you because of lost charity donations!

10

No suction cups!

None of these vendors have suction cups to **protect your investment** (your vendor)! Anyone could just **walk off** with your vendor just by **lifting** it up and **walking** out of the store with it!

11

No lifetime warranty!

With these types of vendors you can **forget** about asking for a lifetime warranty. **You won't even get a 1-year warranty!** Why? Because the units **aren't** made of **space age, high-impact acrylic, PVC** and **ABS** materials, most of these vendors **won't last 12 months!**

Do You Know Why You Will Go Out of Business Buying This Type of Unit?

1 **Fewer donations!** - Charity sign/decal too **small** to read causing the unit to make a lot **less** money from lost charity donations!

2 **No cover lids!** -

- A. This means you can't **fill up** your vendors at **home** and **load** them in your car without snacks **spilling** out of the unit!
- B. You will have to **vacuum** out the **inside** of the unit **weekly** due to the **dust** and **dirt** that will get **inside** of the unit because of **not** having a cover lid!

3 **No variety!** - You can only sell **one** selection of snacks! Selling **more** than one selection of snacks at a time requires the customer to **dig** around for their favorite snack, which customers **hate** and will **not** do! Selling only **one** snack selection means selling **a lot less** snacks!

4 **Does not accept Dollar Bills!** - Even if you **fold** them **twice** it still **jams** up the coin slot. This unit only accepts coins!

5 **The Money Can Be Easily Stolen!**

- A. No lock and key!
- B. The money **sits** inside a **cardboard** coin box waiting to be stolen!

6 **Only cardboard!** - The unit is made of just very **cheap** cardboard! Remember, it's **nothing** more than a **cardboard box!** In 3 months you will have to throw it away and you're out of business. Cheap is **not** good and good is **not** cheap!

7 **No brochure holders!**
No brochure holders are attached for the **charity** you are representing. This dramatically **decreases** the **money** your vendor can make for you because of lost charity donations!

Do You Know Why You Will Go Out of Business Buying This Type of Unit? (Continued)

8

Chocolate will melt!

These types of vendors are **not** made with PVC material that **insulates** the sides of the vendor from **the sun** and other **heat** sources like sitting too close to a pot of hot coffee. Your **chocolate** will **melt** in these types of vendors.

9

No suction cups!

None of these vendors have **suction cups** to **protect your investment**... your vendor! Anyone could just walk off with your vendor just by **lifting** it up and **walking** out of the store with it.

10

No lifetime warranty!

With these types of vendors you can forget about asking for a lifetime warranty. You **won't even get a 3-month warranty!** Why? Because the units **aren't** made of **space age, high-impact acrylic, PVC** and **ABS** materials, most of these vendors **won't last 3 months!**

Do You Know Why You Will Go Out of Business Buying This Type of Unit?

1 Units don't have a built-in lock! - You must add your own security ties that must be cut and replaced every time you remove the money. Anyone can easily cut the ties and steal your money!

2 Fewer dollar bills! - The slot opening where you drop the money in is too small and only made for quarters, not dollar bills. The only way dollar bills will go into the vendor is if you fold them several times and then force them into the money slot opening! Most people will not take the time to fold them and you lose the sale!

3 People can count your money! This is because the cash box is too exposed! They will see too much of your money tempting them to steal it or take the whole unit!

4 They are built vertically, not horizontally! - This construction makes them "gravity-fed" vendors, which means the snacks dispense from the bottom and not the top. When a vendor is gravity-fed, the snacks can at times jam up or get stuck in the side of the vendor putting you out of business!

5 Fun size candy bars don't work in these types of units! - They are too large and jam up or get stuck even more than your small snacks do!

6 Only sells one selection of snacks! - You need to sell three varieties of snacks to make the Big Money!

7 Chocolate will melt! - These types of vendors are not made with PVC material that insulates the sides of the vendor from the sun and other heat sources like sitting too close to a pot of hot coffee. Your chocolate will melt in these types of vendors!

8 They are made of very cheap acrylic! - If you dropped the vendor in a parking lot or if it was knocked off the store's counter top you are out of business! Most of these vendors will never even make it in one piece to your home as they will be damaged during shipping. They are not made of space-age, high-impact acrylic as they should be. Cheap is not good and good is not cheap!

Do You Know Why You **Will Go Out of Business** Buying This Type of Unit? (Continued)

9

No brochure holders!

No **brochure** holders are attached for the **charity** you are representing. This dramatically **decreases the money** your vendor can make for you because of lost charity donations!

10

No cover lids! - This means you can't **fill up** your vendors at **home** and **load** them in your car without snacks **spilling** out of the unit!

11

No suction cups!

None of these vendors have **suction** cups to **protect your investment** (your vendor!). Anyone could just **walk off** with your vendor just by **lifting** it up and **walking** out of the store with it!

12

No lifetime warranty!

With these types of vendors you can **forget** about asking for a lifetime warranty. **You won't even get** a 1-year warranty! Why? Because the units **aren't** made of **space age, high-impact acrylic, PVC** and **ABS** materials, most of these vendors **won't last 12 months!**

These were my **First Models**. They were *nothing* but *trouble!*

When I started out manufacturing in **1974**, I started making these types of vending units. I **loved** them. I **mostly loved** the way they looked. These were very **nice** looking units. However, they were *nothing* but *trouble!*

I stopped making them in **1985** and now, today, only make the model I call the **Snack Vendor®**. Since then, my patent has expired on those first, *early models* and many **other** companies now make and sell them.

Unfortunately, the people who buy them today don't know about my *latest model* or what I know and am **sharing** with **you!** After their purchase, they **learn the hard way** that cheap is *not* good and good is not cheap! They end up **never moving** most of them out of their **garage** because the units are too tall and many store owners and managers say "no" and won't **allow** them in their businesses! The few that do get into stores and businesses *don't* work well and jam up, not to mention a whole list of other **problems**. Bottom line: I would not use them even if they were **FREE!**

Here is a partial list of what was wrong with my first model vending units and why I no longer sell these units. Even so, other manufactures still sell them on the market today so "buyers beware"!

1. **Too tall.**

They are 14 to 15 inches tall. Anything much over 7.8 inches will not be allowed on the counter top next to the cash register!

2. ***They are built vertically, not horizontally.***
This construction makes them “gravity fed” vendors, which means the snacks dispense from the **bottom** and **not the top**. When a vendor is gravity fed, the snacks can at times **jam up** or get **stuck** in the side of the vendor putting **you** out of **business**.

3. ***Fun Size Candy Bars don't work well in these types of vendors.***
They are too **large** and **jam up** or get **stuck** even more than your small snacks do!

4. ***Can't increase your prices.***
The pricing of the snacks is **stenciled** or **printed** on the vendor so you can **never raise** or **lower** your **prices** on the snacks you are selling in the vendor!

5. ***Won't take dollar bills.***
The slot opening where you drop in the money are too **small** and only made for quarters, **not dollar bills**. The **only** way the **dollar bills** will go into the vendor is if you **fold them several times** and then **force** them into the money slot opening!

6. ***People can count your money.***
The cash box is too **exposed**. People could see **too much** of your **money**, tempting them to want to steal it or the vendor!

7. ***They don't have a built-in lock.***
You have to add your own **padlock** or **security ties**. **Store owners** don't like the way the pad locks **look** on their **counter top**. Vendors must have a **built-in lock**.

8. ***No cover lids.***
This means you can't **fill up** your vendors at **home** and **load** them in your car without the snacks **spilling** out of the vendor!

9. ***No brochure holders.***
No brochure holders are attached for the **charity** you are representing. This **decreases** the **money** your vendor can make for you!

10. **Color choices reduce upscale locations!**
Store owners and upscale restaurants will **not** accept **red** or bright neon **pink** and **green** vendors into their business because they do **not blend** well with their décor.

11. **They are made of very cheap acrylic.**
If you **dropped** the vendor in a **parking lot** or if it was **knocked off** the store's **counter top**, you are **out of business**. Most of these vendors will never even make it in one piece to your **home** as they will be **damaged during shipping**. They are **not** made of space age, **high-impact** acrylic, as they should be. Again... Cheap is **not** good and good is **not** cheap!

12. **Chocolate will melt!**
These types of vendors are **not** made with **PVC** material that **insulates** the sides of the vendor from the **sun** and other **heat** sources like sitting too close to a pot of hot coffee. Your **chocolate** will **melt** in these types of vendors.

13. **Where do you place your charity decal?**
There are no good places for your **charity decals**. These types of units don't have a **designated place** for your **charity decal**. You end up with putting it on the front window of your vendor and **covering up** or **hiding** the snacks from **your customers** causing you to lose sales!

14. **No suction cups!**
None of these vendors have **suction** cups to **protect** your **investment** (your vendor). Anyone could just **walk** off with your vendor just by **lifting** it up and **walking** out of the store with it!

15. **No lifetime warranty!**
With these types of vendors you can **forget** about asking for a lifetime warranty. You **won't even get** a 1-year warranty. Why? Because the units aren't made of space age, **high-impact** acrylic, **PVC** and **ABS** materials, most of these vendors **won't last 12 months!**

What makes this decal a very special, state-of-the-art, pricing decal?

There are many reasons!

On the top of the list is this decal is designed to help the vendor collect dollar bills. not just quarters!

What you need to know about my very special state-of-the-art pricing decal!

My exclusive design pricing decal is **NOT** your ordinary decal!

My special pricing decal is designed to do what no other vending decal has ever done before!

This decal is easily **removable** and easily **reusable** so that you can easily change your pricing and change your products as well as to collect **dollar bills!**

When I designed this special pricing decal, I **broke the mold.**

In the manufacturing process, I use **superior quality vinyl material** that is made to last.

The reasons for the design features of the decal are as follows:

1. This pricing decal is designed for **easy placement, easy removal** and **easy reuse.**
2. My pricing decals can be **easily switched out.** Why is this so important? It allows you to change your retail selling price of the products in your vendor. For example, if you switch out the "3 for \$1" decal for the "2 for \$1" decal you can raise your prices. By switching out the pricing decals you can have a price increase or a price decrease on your vendor in seconds! You're never locked in with any one selling price.

3. With my pricing decals, you have complete **pricing flexibility**! For example, in the hot summer months you can sell the less expensive hard candy at "3 for \$1" and in the winter months you can sell the more expensive chocolates at "2 for \$1". Just switch out one decal for a different pricing decal.
4. My pricing decal is the first of its kind design to achieve a **multiple sale** instead of selling only one (1) snack at a time the vendor can sell as many as 2 or 3 snacks at a time, thereby allowing the vendor to charge a \$1 bill instead of only a quarter.
5. My pricing decal is the first vending pricing decal ever to show a picture of a **dollar bill**, which is a subliminal message for the correct amount of money people are suppose to drop into the vendor.

Snack Products

Here are just a few of the many great snacks you can sell!

These top selling brand name companies spend millions and millions of dollars every year to bring you lots of customers to your Snack Vendors®! That's hundreds of millions of dollars of priceless, **free advertising** for your new vending business. What other business can say that?

8. Breath Mints®
9. Wrigley Gum®
10. Chiclets Gum®
11. Tootsie Rolls®
12. Laffy Taffy®
13. Bit-O-Honey®

How Much do Americans Spend on Candy?

The power of the sweet tooth

Each day, Americans spend over \$15,000 a minute, almost \$1,000,000 an hour and over \$22,000,000 on candy alone. The manufacturers spend millions monthly keeping the product in **front** of the public. You couldn't have a product that is **more in demand!** You pay **absolutely nothing** to advertise. Unlike most businesses, it's done for you.

Sure, Americans are spending billions on diets and low-cal and fat-free foods. But if everyone is so hell-bent on eating right, why did the average American gobble up more than **24 pounds** of candy in 2015 compared to only **16 pounds** in 2010? (Source: U.S. Department of Commerce)

Based on figures from the U.S. Commerce Department, the trade association reported that Americans spent approximately **\$25 billion** on **7.1 billion pounds** of sweets last year, at least **HALF** of that sold from vending machines. The record-breaking numbers for 2015 indicate that the typical American consumed a minimum of **2 pounds** of candy a month, continuing a trend that has been growing for the past five years.

Who Eats the Most Candy?

While most children are Voracious candy eaters, **ADULTS** actually consume more candy than both children and teenagers combined.

Adults consume **55%** of all candy.

Do you want to **own your own
business?**

Do you want to **be your own boss?**

**Do you want to have extra cash for
yourself or your family?**

Now is your chance!!!

You will find out how to do it... here... now... *today!*

There's a lucrative, recession-proof opportunity now within your grasp. Imagine an absentee ownership business with **NO rent, NO advertising, NO overhead, NO selling, and NO bad checks.** Now, imagine a business where snack vendors do all the selling for you, vending automatically. What's more, automatic vending is the **ultimate CASH business**, and ***you'll be amazed how simple it really is!***

And here's the secret: 2 out of 3 vending businesses are operated by ambitious, independent people like yourself - not large corporations!

Do You Know Why Most Beginners/Investors Pick The #LWV 1400 Snack Tower Vending Units® To Start Their Vending Business?

- 1** Because of its **100% mechanical design**, the unit virtually never breaks down! The unit is virtually never "out of order". There are **NO ELECTRONICS** and **NO REFRIGERATION** to break down or worry about. You virtually never need to carry a toolbox with you!
- 2** Because of its **compact size**, the unit is easy to transport in your car from your home to your locations (stores/business). You will **not** need the additional cost of a truck with a lift gate.
- 3** Because of the fact that the unit **uses no electricity**, businesses are less likely to insist you pay them a commission on each visit!
- 4** Snack sales stay **strong** all year long where soda sales dip in the winter months.
- 5** Snack products are **much easier** to work with when it comes to stocking the vending units due to their light weight. **No need to lift heavy cans of soda**, which can be back-breaking work and sometimes even require a dolly!
- 6** The 1400 Snack Towers® have virtually unlimited locations available. Why? Because of the unit's compact size, this unit can go virtually where no vending machine has **ever** gone before - onto countertops in stores! Up until now, many of these stores and businesses have had to go without a vending machine or vending service because they did **not** have the floor space needed for a **huge** vending machine.
- 7** This unit is virtually **the most affordable** snack unit on the market, which means a **faster return on your investment!**
- 8** This unit is offering **proven products** that the public buys **everyday!**
